PROFESSIONAL SUMMARY

Cloud Engineer with hands-on experience designing, deploying, and maintaining AWS cloud infrastructure for enterprise applications. Skilled in server sizing, auto-scaling, backup/disaster recovery, and infrastructure monitoring, with additional experience in automation scripting, SAP B1/HANA support, and manual QA testing.

PROFESSIONAL EXPERIENCE

Cloud Engineer I

October 2025 – Present

Beacon Solutions INC - Mother Ignacia Ave, Quezon City

- Delivered monthly infrastructure reports covering EC2 health, CPU load, memory utilization, storage usage, S3 consumption, and ticket analytics — improving visibility into system performance, supporting capacity planning, and helping prevent potential incidents
- Continuously monitored and updated AWS Auto Scaling configurations to align with application changes deployed by third-party developers, ensuring optimal scaling behavior and uninterrupted service during releases
- Researched and studied technologies and architectures used in upcoming support projects to build technical readiness and ensure smooth onboarding and knowledge transfer

Junior Cloud Engineer

March 2024 – October 2025

OGIS PH - Ayala Ave, Makati City

- Deployed and configured cloud infrastructure for SAP Business One (SAP B1) and SAP B1 HANA applications, ensuring stable and scalable environments for client deployments
- Designed AWS server sizing recommendations tailored to individual client requirements, balancing performance needs with cost efficiency
- Implemented and maintained backup and disaster recovery solutions for cloud servers and SAP applications, including regular restore testing to validate data integrity and business continuity
- Conducted systematic testing of backup and replication processes for both server infrastructure and SAP application data to ensure reliability during failure scenarios
- Monitored cloud server performance and resource utilization, delivering regular reports to stakeholders to support capacity planning and optimization decisions
- Developed automation scripts tailored to client-specific workflows, reducing manual effort and improving operational efficiency
- Built proof-of-concept (POC) solutions leveraging AWS services — including Lambda, API Gateway, S3, Cognito, DynamoDB, and Textract — to demonstrate scalable, serverless architectures for client use cases

Software QA (Manual Tester)

June 2023– March 2024

Technomancer Inc - Holy Spirit, Quezon City

- Designed and executed manual test cases using Azure DevOps/Azure Test Plans to validate web application functionality against business and technical requirements
- Performed API testing using Swagger to verify endpoint functionality, request/response accuracy, and integration reliability
- Imported and prepared test data using AWS S3 and AWS Glue to support accurate and realistic test scenarios

- Logged, tracked, and managed defects through Azure DevOps, collaborating with developers to verify fixes and ensure timely resolution
- Conducted functional and regression testing across web application features to support stable, high-quality releases

Intern – Web Developer

January 2023– May 2023

Technomancer Inc - Holy Spirit, Quezon City

- Built proof-of-concept (POC) solutions for Web Application Features

EDUCATION

Bachelor of Science in Information Technology

June 2023

Bulacan State University – Meneses Campus

- Achievements:
 - Latin Honor (Cum laude)
 - Dean's List

SKILLS

Technical:

- Front End
 - HTML, CSS, Bootstrap, JavaScript, jQuery
 - Beginner in React JS and Angular
- Backend
 - PHP, MySQL, AWS Lambda, AWS API Gateway, Cognito and AWS Dynamo
 - Beginner in Laravel and Spring Boot
- Cloud
 - AWS EC2, AWS S3, AWS Calculator
- Network, Infra and Application
 - SAP B1 Cloud Setup and Migration
 - Linux (SUSE Linux, Ubuntu)
 - Hardware troubleshooting
 - Network Cabling

Personal:

- Quick learner
- Ability to work independently or as part of a team
- Problem Solving
- Attention to detail

CERTIFICATION/s

- AWS Certified Solutions Architect (Associate)
 - Issued by: AWS Training and Certification
 - Validity: May 23, 2024 – May 23, 2027
